

HMDX Jam Rubber Battery Cover Replacement

How to replace the rubber cover which is attached to the bottom of the speaker.

Written By: Blake Rounds

INTRODUCTION

This guide explains how to remove or replace the rubber base for the HMDX Jam.

TOOLS:

- [iFixit Opening Tools](#) (1)
-

Step 1 — Rubber Base

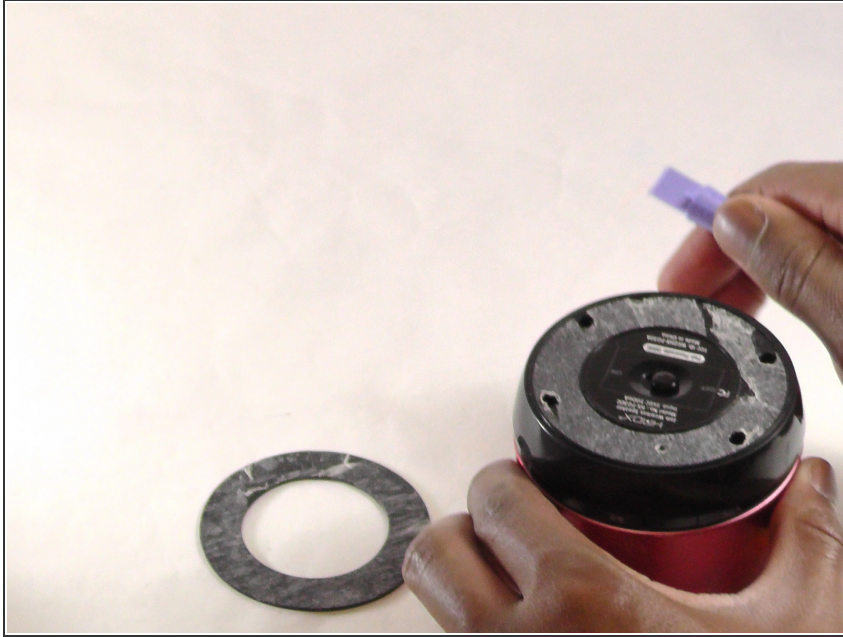

- Pry off the rubber cover at the bottom of the speaker by using the plastic opening tool.

Step 2

- Slowly peel the rubber cover off.

Step 3

- After completely removing the rubber cover, find a new cover and prepare both it and the device for attachment.

Step 4

- Carefully replace the old rubber with the new one, being mindful to line the cover up correctly with the outside edge of the device as well as the inner cover.

To reassemble your device, follow these instructions in reverse order.
